Introduction.....	5
I. Dom Manipulation.....	6
1. The DOM Ready Event.....	7
2. Execute Page Specific Code.....	7
3. Use the JavaScript AND Trick.....	8
4. Use the jQuery is() method.....	9
5. Find out how many elements your page has.....	10
6. Define an exists() function.....	10
7. Use the second argument to the \$() function.....	11
8. Mark external links with an icon.....	12
9. Master the end() method.....	13
10. Prevent right clicking.....	14
11. Break out of iframes.....	14
12. Parse URLs with Anchor Elements.....	15
13. Make your stylesheets editable.....	16
14. Prevent text from being selectable.....	16
II. Performance.....	18
15. Include jQuery from a CDN.....	19
16. Keep DOM touches to a minimum.....	19
17. Don't be afraid to use vanilla JS.....	20
18. Optimize your selectors.....	20
19. Cache things.....	23
20. Define repeated functions once.....	24
21. Treat jQuery objects as arrays.....	25
22. Detach elements when doing complex modifications on them.....	26
23. Don't wait for the load event.....	27
24. Create a stylesheet when styling multiple elements.....	28
III. Events.....	29
25. Assign a "JS" class to the <html> element.....	30
26. Listen for events on elements that do not yet exist.....	30
27. Single use event listener.....	31

28. Event simulation.....	32
29. Working with touch events.....	33
30. Know your events.....	34
31. Quickly prevent default events actions.....	36
32. Chain event handlers with event.result.....	37
33. Create custom events.....	37
IV. AJAX.....	39
34. Display file sizes next to download links.....	40
35. Simplify your Ajax calls with deferreds.....	41
36. Run multiple AJAX requests in parallel.....	42
37. Get your IP with jQuery.....	42
38. The simplest AJAX request.....	42
39. Serializing objects.....	43
40. File uploads with jQuery.....	44
41. Work with Facebook's Graph.....	46
42. Access weather information.....	47
43. Fetch your latest Tumblr posts.....	48
44. Find the geographic location of an IP address.....	49
45. Scrape sites with YQL.....	50
46. Use the global AJAX methods.....	51
V. Master Class.....	52
47. Learn to love the console.....	53
48. Convert code to plugins to promote reuse.....	55
49. Use anonymous functions to isolate code.....	56
50. Merge objects with extend.....	57
51. Use jQuery.type().....	59
52. The map method.....	61
53. The \$.grep() method.....	62
54. Sort the elements inside a jQuery collection.....	63
55. More about jQuery Deferreds.....	64
56. Call jQuery methods conditionally.....	65
57. jQuery callback lists.....	66
58. Make an image black and white.....	68
59. Create a custom pseudo selector.....	70
60. Custom easing functions.....	71
61. (Mis)use jQuery's Animation Queue.....	72

62. Custom CSS properties using hooks.....	73
63. The jQuery \$.proxy() method.....	75
64. Pass callbacks to jQuery's methods.....	75
VI. Plugins.....	78
65. Test HTML5 support with Modernizr.....	79
66. Bring media queries to jQuery.....	80
67. Speed up your site with a script loader.....	81
68. Render HTML with templates.....	81
69. Give jQuery a utility belt.....	83
70. Simplify JavaScript's date and time functions.....	86
71. Use classical inheritance in JavaScript.....	87
72. How to work with IndexedDB.....	88
73. jQuery and cookies.....	90
74. Parse and print markdown.....	91
75. Animate and work with colors.....	92
76. Upgrade jQuery with CSS3 animations.....	93
77. Show full screen YouTube video backgrounds.....	94
78. Enhance your web app with better dialogs.....	94
79. Notifications in your favicon.....	96
80. Supercharge your select dropdowns.....	97
81. Blur page elements with blur.js.....	98
82. Generate QR Codes with jQuery.....	99
83. Face detection with jQuery.....	100
84. Trigger full screen mode.....	101
85. Manipulate the browser history.....	102
86. Turn textboxes into rotating knobs.....	103
87. Work with money and currencies.....	105
88. Easily display Google Maps.....	105
89. jQuery and Web Workers.....	107
90. Mask input fields.....	108
91. Lightweight form validation.....	109
92. Work with retina graphics.....	110
93. Instagram-like filters with JavaScript.....	111
94. jQuery keyboard shortcuts.....	114
95. Inflate web type.....	115
96. JavaScript and web cameras.....	115
97. Responsive date picker.....	117

98. Handling file drag&drop in the browser.....	118
99. Rumble elements with jRumble.....	120
100. Dynamic charts.....	121
Summary.....	124
